

# Joshua Gardner | Computer Science Graduate

Email: [joshuawgardner1@gmail.com](mailto:joshuawgardner1@gmail.com)

## Professional Profile

---

Throughout my Education I have achieved high grades in Modules, Gaining experience in Multiple programming languages (e.g. C++, Java, Python) and paradigms. (Graphics, Computer Vision, CNN, Modelling, Image processing, Networking, Security, Web development).

I have developed multiple projects/applications both individual and team work. Some of the projects I have worked on include; an app to find the nearest doctors in the Gwynedd area, for my dissertation/final year project I gained experience in using CNN's and object detection using TensorFlow in Python to detect specific foods in MRI Scans.

I have experience in Image Processing and OpenCV in both Python, C++ and MATLAB, working with many aspects of Java (Sockets, GUI, Maven and testing), Python scripting, Database management using MySQL & SQLite, SQL with Java & Python back-end. Research and technical skills in Object detection, Convolutional Neural Networks and Machine learning. Web development with HTML, CSS, JavaScript. Graphical work in OpenGL/GLSL, Blender and Processing. Agent based modelling in Netlogo.

## Skills

---

- |          |   |                           |
|----------|---|---------------------------|
| • C/C++  | • DB management (MySQL, SQLite, Python, Java) | • MATLAB                  |
| • Java   | • Machine Learning/CNN                        | • HTML/CSS/JavaScript     |
| • Python | • Object Detection                            | • OpenCV/Image Processing |
| • SQL    | • OpenGL                                      | • Blender                 |

## Educations & Qualifications

---

BSc (Hons) 2:1

Computer Science

Bangor University (*Prifysgol Bangor*) 2017-2020

---
